

ELAC Element EA101EQ-G Integrated Amplifier

ELAC The life of sound.

Changes the rules
of engagement.

ELAC Element EA101EQ-G

The Element EA101EQ-G makes quite a statement and is guaranteed to change the rules of the game for integrated amplifiers, with sound quality and feature-rich control flexibility that make it the go-to solution for a no-compromise sound system.

BASH®-amplification solution:
At their heart is a brand new BASH Tracking Amplifier delivering 80 Watts per channel into either 4 or 8 ohm speakers.

App-rich control flexibility:
ELAC's free iOS and Android app allows users to fully control and set up their system.

ABC Technology:
The companion iOS and Android app measures the near-field response of main speakers and subwoofer, then pinpoints the subwoofer's optimal crossover frequency.

This integrated amplifier marks ELAC's return to the amplifier category. The Element Series EA101EQ-G Integrated Amplifier solves two of the biggest problems with two-channel audio: proper blending of a subwoofer with your main speakers and room correction. Our advanced DSP and innovative smartphone application provide all the tools necessary for anyone to achieve a true audiophile system at an affordable price.

ELAC Element EA101EQ-G Integrated Amplifier

ELAC The life of sound.

Technical Specifications:

Height x Width x Depth	56 x 204 x 285 mm
Weight	2,5 kg
Power output	2 x 80 W, BASH®
Analog inputs	2
Digital inputs, optical	2(192 kHz / 24 Bit)
Digital inputs, coaxial	1 (192 kHz / 24 Bit)
USB input	192 kHz / 24 Bit, asynchronous
	Dolby Digital / DTS Decoder Bluetooth Audio with aptX control with iOS®- and Android®-App
Subwoofer output	1 with Remote EQ
Crossover frequency	automatically adjusting (by App)
Headphone output	1
